

Third Announcement

ICCESI 2019

International Conference and the 10th Congress
of the Entomological Society of Indonesia

6th-9th October 2019

Kuta, Bali, Indonesia

Harris Hotel & Residences Sunset Road

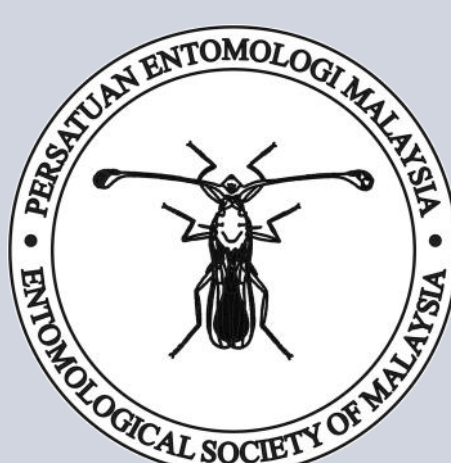

**“Learning from the Past, Adapting for the Future:
Advancements in Ethnoentomology and Entomological
Science for Food Security and Health”**

HIGHLIGHTS

Human-insects interactions have been going on for thousands of years. The roles that insects play as pollinators, predators, pests and vectors of disease as well as food in many cultures marks the importance that insects play in human lives.

In commemoration of its 49th year of existence, The Entomological Society of Indonesia will host an International Conference and the 10th Congress of the Entomological Society of Indonesia (ICCESI) on the advancements of Insect Sciences and Ethnoentomology. We invite professionals, scientists, students, practitioners, artists, to join us in a 3-day seminar that will bring in scientists and professionals from around the world to share their knowledge and experiences. The event will also include poster sessions, field trips, insect photography competition, student Linnean Game competition, and cultural events. The Conference will also highlight recent issues in entomology such as global insect decline, Invasive Alien species, insect conservation, insect as bioindicator, ethical research and illegal wildlife trade. These topics will be discussed in the parallel sessions and we anticipate cross-discipline dialog that can be the seed for co-creation of new knowledge. ICCESI is a great opportunity for delegates to engage members of various organizations, groups, and associations whose presence is essential for the advancements of entomological sciences related to food security and health.
